## SUMMARY

Aspiring Cloud Computing and MERN Stack developer with knowledge of programming, networking, and IT support. I'm excited to work on real-world projects and grow my skills. I have a strong interest in AWS and have built multiple projects using MongoDB, Express.js, React.js, and Node.js. I'm looking for an entry-level opportunity to start my journey in tech.

---

## WORK EXPERIENCE

### AMAZON (AICTE)

- Migrate existing on-premises services from physical data centers to cloud using cloud migration and automation
- Write scripts to automate operations and server management
- Maintain QA and production configuration using automation tools
- Build and maintain operations tools for monitoring, notifications, trending, and analysis

## PROJECTS

- AI-Powered Code Reviewer

Built a full-stack app with MERN and OpenAI API to review code, suggest improvements, and highlight errors. Added auth, real-time feedback, and smooth UI.

Live Project: <https://ai-powered-code-reviewer-1-frontend.onrender.com/>

- Event Planning App | MERN Stack

Created a full-stack app to create, manage, and book events. Added user auth, CRUD operations, and a user-friendly UI using MongoDB, Express, React, and Node.js.

Live Project: <https://event-planning-application-with-mern-jp2e.onrender.com/>

---

## EDUCATION

### Master of Computer Applications

Sep 2023 - Sep 2025

Galgotias University

- Advance learning about computer Applications.
- Learned about the concept of cloud computing.

### Bachelor of Science

Aug 2020 - Aug 2023

D.S.B Campus Nainital (Kumaun University ).

- Basics of Computer Applications .
- 

## ADDITIONAL INFORMATION

- **Technical Skills:** HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, GitHub, SQL, Render, Vercel
- **Languages:** English, Hindi
- **Certifications:** Aws cloud, introduction to Generative AI, Machine Learning with python and many more.....
